ROS v7 differences in IP/Route

IP routes no longer contain the Rules, VRF, and Nexthop tab under the IP Routes menu.

Step-by-step guide

Rules in v7:

1. First, add table in /routing table menu
2. Then you can add routing rules in /routing rule menu and routes in specific table
3. `/ip route add dst-address=x.x.x.x@table gateway=y.y.y.y@main`

VRF in v7:

1. First, add interfaces to a list,
2. Add the list to a vrf.

Nexthop:

1. Nexthop is available at routing/nexthop/print
