LtAP : SIM not inserted

Problem
LtAP log messages indicate, that the SIM card is not inserted:
00:05:35 lte,async lte1: sent AT+CPIN?
00:05:35 lte,async lte1: rcvd +CME ERROR: SIM not inserted

Solution

<table>
<thead>
<tr>
<th>The modem does not see any SIM cards inserted:</th>
</tr>
</thead>
<tbody>
<tr>
<td>+CME ERROR: SIM not inserted</td>
</tr>
</tbody>
</table>

Please check if you are using the correct SIM slot. For the modem inserted in the bottom mini-pcie slot (this is the slot where modem that comes pre-installed in an LtAP lte kit is located) you need to use either sim slot 2 or sim slot 3. And the used sim slot needs to be selected in RouterOS.

CLI command to select the sim slot:
/system routerboard modem set sim-slot=2
